DENMARK

BRAND STORY

Based on the principles of the old mortar, CrushGrind® was developed to be more than just a pepper mill, established to create a better grinder than available on the market.

Through will, passion and a bit of nerdiness we invented the original ceramic mechanism—a revolution of traditional pepper mills enabling consumers to grind not only pepper, but also salt and all sorts of dried herbs and spices. Our invention made releasing the essential oils and full aromas from spices possible.

With our 1994 mill we offered a new and better way to adjust the grinder and an easier way to fill the spices.

Our mindset is characterized by our authentic story and eagerness to create better kitchen tools.

We aim to inspire our consumers and give them the best gastronomic experience—because we believe that everybody deserves one.
